

Introduction to Slide Ukulele

This is a very easy way to play any Major or minor chord on a ukulele. If you play just the open C, E and A strings, you are playing an A minor chord (Am = A, C, E). At the 1st fret, it's Bbm, 2nd fret = Bm, 3rd fret = Cm, etc.

To play Major chords, go to the G, C and E Strings. Open strings is (C Major = C, E, G) 1st fret = C# (or Db), 2nd fret = D, etc.

You can fret the chords with a finger, or use something as a "slide". 1" PVC works well with nylon strings. You can also use an old medicine bottle, an actual guitar slide made from metal or ceramic, etc. Or a "Fretting Stick". Experiment! Have fun!!!
